## PROFESSIONAL SUMMARY

Software developer with professional experience in data engineering and a Software Engineering student. I develop applications and data solutions that integrate, process and analyse large volumes of data, from building applications and ETL/ELT processes through to their deployment in the cloud. I have experience in Java, JavaScript, TypeScript, React, Python and SQL, and I work with cloud platforms and tools such as GCP, AWS and OCI. I combine initiative, continuous learning and best development practices to collaborate with multidisciplinary teams and turn business requirements into scalable and reliable solutions.

## TECHNICAL SKILLS

**Languages:** Java (SE/EE), JavaScript, TypeScript, Python, Advanced SQL
**Web Development & APIs:** React, web application development, API Integration
**Software Engineering:** Object-oriented programming, data structures, design patterns, Clean Code, Git and GitHub
**Cloud & DevOps:** Google Cloud Platform (GCP), AWS, Oracle Cloud Infrastructure (OCI), Docker, Kubernetes
**Data:** ETL/ELT, data modeling, stored procedures, web scraping, Looker Studio, Tableau
**Security:** Information security and data protection principles

## PROFESSIONAL EXPERIENCE

**OMNICOM MEDIA COLOMBIA** **MAR/2025 – Present**
*Data Engineer | Application and data pipeline development on GCP*

- Developed geospatial intelligence applications with cartographic analytics to support strategic planning, covering everything from data processing to delivery to the end user.
- Designed and implemented ETL/ELT architectures on Google Cloud Platform to integrate large volumes of data from diverse sources, with automated execution.
- Developed complex stored procedures and optimized SQL queries, improving data speed and integrity.
- Automated the extraction of comments and unstructured data through web scraping, transforming it into clean, normalized databases for analysis.
- Built and maintained Looker Studio and Tableau dashboards, automatically fed by GCP pipelines, to support executive decision-making.

**VIBO CAPITAL** **FEB/2024 – JUL/2024**
*Data Analyst*

- Conducted market analysis and generated strategic insights using data tools.
- Implemented information security policies and audits that closed critical gaps in the company's systems.
- Delivered corporate training sessions on security and the protection of confidential data.

**EXACOM I.T** **AUG/2023 – OCT/2023**
*Java Learning Coach | Instructor and Java Developer*

- Developed and optimized Java applications, applying Clean Code principles and programming best practices.
- Taught Java SE/EE through a project-based approach, covering object-oriented programming, data structures, and design patterns.
- Designed and delivered training plans and hands-on workshops to strengthen problem-solving skills in collaborative environments.

## EDUCATION

**Politécnico Grancolombiano** **SEP/2025 – Present**
*Software Engineering (in progress)*

**SENA** **JUN/2019 – JUL/2021**
*Professional Technician in Software Programming*

## CERTIFICATIONS & ADDITIONAL TRAINING

- Universidad de los Andes: Front-End Web Development with HTML, CSS, and JavaScript (Jul/2026 – Sep/2026)
- Oracle Certified Foundations Associate, Oracle University (Nov/2025)
- Google Professional Certificate: IT Support (Aug/2024 – Nov/2024)
- Google Professional Certificate: Cybersecurity (Nov/2023 – Apr/2024)
- Google Professional Certificate: Data Analytics (May/2023 – Oct/2023)

## LANGUAGES

Spanish: native | English: B1 (intermediate), working toward B2
